

## Home Care

At Hibernia Care Services Limited, our Home Care service is built around compassionate, professional, and personalised support delivered in the comfort of each client's home. We recognise that every individual has unique needs, and our caregivers are committed to providing assistance that promotes independence, dignity, and overall well-being.

Our Home Care services focus on non-medical daily living support. This includes help with personal hygiene, dressing, meal preparation, mobility assistance, light household tasks, and medication reminders. In addition to practical support, we place great importance on companionship and emotional well-being ensuring clients feel heard, valued, and socially connected.

We prioritise maintaining a safe and comfortable home environment. Our caregivers are trained to identify potential risks, support safer living arrangements, and offer guidance to clients and families on best practices for creating a secure space. This proactive approach allows individuals to continue living independently while receiving the support they need.

Each care plan is tailored to the client. We work closely with clients and their families to understand their routines, preferences, and personal goals, ensuring that our support aligns with their lifestyle and respects their choices. Our holistic approach considers physical, emotional, and social needs to provide well-rounded, person-centred care.

At Hibernia Care Services Limited, we are committed to delivering reliable, compassionate, and consistent support. Through our dedicated Home Care service, we empower clients to enjoy meaningful daily activities, maintain autonomy, and experience a safe, nurturing, and fulfilling life at home.
